	Storing, temperature	10 -30 Centigrade
	Storage time, calculated	10 years
	Optical properties	Class 1 EN-166
	Spherical and astigmatic refractive power	0.00 (< 0.06 m-1)
	Vertical prismatic refractive power	0.00 (<0.25 cm/m)
	Horizontal prismatic refractive power	0.1 (<0.75 cm/m)
	Transmission	89% (>74.4%)
	Diffusion	0.2 (<0.5)

Ergonomy

Low product weight and soft foam that breathes

- Reduced risk of irritated skin or heat rash
- Reduced risk of pressure marks or abrasions

Adjustable rigid headband

- The shield stays in place even during rapid movements
- • Reduced need to adjust the cover during use

Good optical properties

Sustainability

The product is made from several materials, which makes material recycling complicated, the product is well suited for energy recovery. Protective materials in health and care are normally sent for incineration due to the risk that they may be contagious.
